On April 24, 2008, VideoStudio was released as a free version for home use, and was also released as a paid version. At that time, it was one of the best video editing software for Windows. The VideoStudio Pro version has a new model which is integrated with Windows Media Player. VideoStudio Pro has been updated in the Build 2020 with VideoStudio Pro version which has a built-in professional video editor, but in a standalone Build 2019 video editor. This is because of Microsoft's commitment to end the use of Windows Media Player. Build 2020 would be an important software to upgrade for the video editing industry. This software is very new and fast. You can edit videos directly from the DVD player or from the computer, but it has been integrated with a Video Studio hardware for the professional use. Features Supported file formats While the software can edit several formats, only the following are officially supported. AVI DVD DVD-Video (requires DVD drive with 50 MB free) DVR-MS (requires Media Server) MPEG-1, MPEG-2 PAL SD NTSC SD MiniDV VCD Main features Assembling videos from multiple sources: AVI, DV, MP4, DVR-MS, and DVR-MX. Adding effects to a video: VST-Filter, Color Decoration, Rotate, Crop, and AVI-XS2, XS4, XS5, and Video To DVD.
